Subject: CNSC Response to SRB Final Report on the June 2, 2015 Action Level Exceedance.

Dear Mr. Levesque,

CNSC staff have reviewed SRB's final report on the May 26 to June 2, 2015 action level exceedance [1]. SRB identified two root causes and recommended five corrective actions to address the root causes. Overall, the CNSC staff found the report to be acceptable and have one recommendation for SRB's consideration.

Recommendation 1: SRB should conduct a comprehensive step-by-step review of the procedures and training to ensure that the appropriate checks and alerts are in place to identify if there are any problems during tritium processing.

CNSC staff will follow up on SRB's corrective actions in future compliance activities.

Sincerely,

Jennifer Campbell
Project Officer
Nuclear Processing Facilities Division

c.c.: R. Fitzpatrick, J. MacDonald, M. Rinker (CNSC), M. Jones (CNSC), N. Kwamena (CNSC)
